

SOMMERS HOUSE

PROJECT: SOMMERS HOUSE

LOCATION: HOLLYWOOD HILLS . LOS ANGELES . USA

YEAR: 2014

This house located in the city of Los Angeles, is a commission from renowned saxophonist player Jimmy Sommers. The plot with a steep slope makes this residence unfold in a series of terraced floors of irregular shape that use green roofs to integrate it into the lush vegetation of the place while adapting to a complex program and to the restrictive local regulations.

At the level of the top road, is located the entrance in coincidence with the top floor of the house. An elevator and the round staircase divide each floor into two wings. In this floor, are located the dining area, the kitchen and living room, limited on one of the side by a glass wall which allows us to contemplate the parked cars. In the other wing, is the studio area.

Descending to the next floor, there are the guest bedrooms and a large playing area. Also, the master bedroom and a spectacular bathroom with access to an exterior jacuzzi.

In the floor below the recording studio is placed, a home cinema and a large and partially covered space with sitting and dining areas, bbq, bar, and an infinity pool area with a breathtaking view over the city of Los Angeles.
